

PINK POPCORN®

INTRODUCING

Pink Popcorn®

Introduced by Briggs Nursery, this hardy northern high bush blueberry is a more compact grower than other varieties, and bears pink fruit that ripens early to mid-season. The medium sized, cream to pink berries have a darker pink blush, and offer true blueberry flavor and aroma. At a mature size of 5'H x 5'W, Pink Popcorn® can be planted in rows, or incorporated easily into the landscape, where its leaves offer red fall color. Pink Popcorn® is self-fertile, but will produce a larger crop of berries if planted in proximity to another early season variety. Like all blueberries, Pink Popcorn™ prefers an acidic soil with adequate moisture.

- Vaccinium corymbosum 'MNPINK1' USPPAF, CPBRA
- Pink Popcorn® Blueberry
- 3 to 7
- 5'H x 5'W at 10 years
- Vase shaped
- Acidic soil; even moisture; full sun; approximately 800 chill hours
